

## *Autumn 2010*

### **Computer System**

All GP Practices in Scotland are currently changing from the old GPASS computer system to a new system. We have been allocated the week commencing 20th September for this changeover to occur.

We will only be able to offer emergency appointments due to difficulties in accessing our patient's computerised records and the recording of new consultations during the changeover.

Could patients please ensure that they order repeat medication BEFORE THE 17th September to cover them during this period up until the 4th of October as we will be unable to print off any repeat medication prescriptions during this time.

We thank you in advance for your patience while this system is implemented.
